

Titanium LMS™—Training and Certification Anywhere, Anytime

The **Ti LMS™** platform is a fully validated, SCORM-compliant Learning Management System that enables life sciences companies to train, track and credential their sales representatives, contractors, and other personnel.

Ti LMS™ offers an ideal online training solution for small- to medium-size companies. Training modules and reporting features can be accessed 24 hours a day, seven days a week, whether from a desktop or mobile device. And companies that use LMS solutions from QPharma are able to ensure optimal compliance with regulations that include 21 CFR Part 11, which outlines requirements for audit trails and electronic signatures.

Ti LMS™ features a robust library of more than 50 compliance training topics and enables training managers to offer both synchronous (instructor-led) and asynchronous (eLearning) curricula. QPharma's full-featured LMS administration approach allows our account executives to function as an extension of the client's staff, ensuring superior service and support. Additional services that are available include instructional design, SOP repositories, and experienced Subject Matter Expert consulting — affording our clients an end-to-end solution for training and certification.
