

Ti License®— Your One-Stop Solution For Life Sciences Distribution Licensing

QPharma® provides comprehensive distribution licensing services for pharmaceutical, medical device, and life sciences companies, alongside regulatory compliance and product distribution solutions. To operate compliantly, companies must manage complex state regulations, maintain up-to-date licenses, and handle timely application filings.

QPharma's regulatory specialists streamline this process by managing prerequisites, resolving compliance issues, and preparing and submitting applications—ensuring clients are fully licensed to distribute drugs, devices, biologics, and other healthcare products across all U.S. states. The Ti License™ technology gives clients a centralized, real-time view of nationwide licensure, including license copies, renewals, and expirations.

Whether supporting small companies launching new products or large global manufacturers, QPharma's experts provide full-service licensing support.
